Covering 1.0 after seeing an earlier version?

Terminology changed substantially between Beta 2026-2 and 1.0. Finesse became **Deft**, Awareness and Intuition were removed as Derivatives, and most mechanical icons were redrawn. The full term-by-term diff is in Converting from Beta 2026-2.

Using this kit

You may quote, excerpt, paraphrase, or reproduce anything on this page in articles, videos, reviews, podcasts, storefronts, and coverage of any kind, without asking.

Branding assets may be used to illustrate coverage, on two conditions: do not alter the logo or wordmark, and do not use them in a way suggesting Frontiers produced or endorses your own product. Using the logo to write about us is fine; using it as a badge on your own game is what the conditions rule out.

This permission covers coverage and commentary only. It is separate from the ORC License, which governs the rules themselves, and from the Trademark & Usage Policy, which governs building products on the engine.

Attribution

When referencing or covering Frontiers, please link to frontiersengine.dev. Crediting Jayke Paver as creator is welcome and never required.
